NASTURTIUM

NATIVE VIOLET

VIOLA

CARNATION PETALS

FRENCH MARIGOLD

PANSY PETALS

CALENDULA PETALS

BASIL FLOWERS

IMPORTANT - PLEASE READ!

- There are a lot of look-alike plants in nature. Before serving any flowers to your guests triple check that they are safe! I suggest growing your own in the warmer months, reaching out to a local farm or finding an edible flower supplier online!
- Never eat flowers grown commercially or for floral arrangements. They are often sprayed with pesticides and other harmful chemicals.
- Only eat the flower's petals; do not eat the stamen or pistils unless you know for sure it's okay to do so.
- STORAGE: When you receive or pick your edible flowers store them as soon as possible in the fridge with a damp paper towel to help them last!
